ERSI Group demonstrates commitment to sustainability at Beesley's Point

Marmora, NJ – ERSI Group and its subsidiary Beesley's Point Development Group, LLC "BPDG" has committed to preserving over 100 acres of the area surrounding the former BL England Power plant.

"While the property is in need of robust redevelopment, BPDG is committed to sustainability practices in our efforts to rebuild and restore the site", stated Chris Wilson, managing member of BPDG. In the plans are wetlands restoration, raised walking trails throughout the marsh, living shorelines, oyster reefs, and the creation and restoration of habitat damaged by the operation of the power plant. Migratory birds are also a focus of the group and efforts will include pond creation and restoration with a focus on native plants and trees that will serve as resting and feed areas for the spring and fall migration.

Experience in Coal Power Plant Retirement

As market factors in the energy sector have shifted away from fossil fuel generation, ERSI Group has acquired multiple retired energy assets for the purposes of environmental reclamation and redevelopment.

ERSI Group actively seeks to purchase brownfield real estate assets in all energy and industrial sectors. Our acquisition strategy provides optimal solutions for sellers and communities with the end goal always to return the brownfield site to productive reuse.

About ERSI Group

ERSI Group. is a privately held, New York, NY based real estate acquisition and development firm focused exclusively on acquiring underutilized, distressed and environmentally challenged industrial real estate. We look to provide companies comprehensive solutions for divesting excess real estate.

With robust financial backing and a unique blend of real estate, environmental and legal expertise, ERSI Group transitions properties back to productive use, maximizing their economic development potential, attracting new jobs while investing in the local communities.
